

**Xelay Acumen Group, Inc.
Business Analyst, Consulting**

Company Description

Xelay Acumen Group, Inc is a strategy and management consulting firm serving biotechnology, pharmaceutical, and health care provider clients. Our engagements focus exclusively on high value-add for our clients' most critically important issues and challenges. Xelay Acumen strives to be the leading healthcare strategy and management consulting firm focused on enabling distinctive success for innovative products that matter. We deliver extraordinary results for our healthcare clients by attracting and developing talented high potential team members.

At Xelay Acumen Group, Inc., our people are excited to help clients address their most pressing issues and challenges. We leverage the flexibility and expertise of our diverse network and organization and bring to bear an unparalleled combination of skill sets: strategic problem solving, rigorous analyses and methodologies, and clear and concise communications to bring about uniquely extraordinary results.

Job Description

Xelay Acumen Business Analysts are a diverse group of highly qualified people with a wide range of backgrounds, from hard science to literature. Offering challenging responsibilities, broad business exposure and unrivaled career prospects, Xelay Acumen's Analyst role provides an unparalleled opportunity to apply knowledge, business intuition, and analytical rigor to real-world challenges, building invaluable skills and experience along the way. Generally, Analysts join directly out of college or university, from a Master's program, or after less than three years of work experience. It's a great way to set yourself up for future success—at Xelay Acumen and beyond. Analysts are the heart and soul of our organization. They are our frontline in developing powerful insights and driving results for our clients. We invest heavily in our Analysts, and believe in the apprenticeship model of management consulting. Analysts at Xelay Acumen tackle the most advanced and difficult problems our clients face, including understanding and shaping new markets, helping frame new business and medical treatment models, assessing specific competitors' performance, performing due diligence, and driving it all to bottom-line financial returns and value creation.

Responsibilities

The Business Analyst role is a full-time consulting position to support, advise on, and implement key strategic initiatives, support strategic analyses of clinical, medical, and market data within the biotechnology, pharmaceutical, and health care provider industry, and collaborate with client and team members to accomplish project engagement goals and objectives. Responsibilities include:

- Problem Solving
 - Structure problem solving to address critical business issues
 - Manage individual and team member work streams
